But where all did so well we deem it unnecessary to particularize; we will be pardoned for mentioning only a few-it is not because others are less meritorious that we do not continue through the programme but because space will not permit.

The only annoyance experienced during the exercises was the bad order in the house. This is very easily accounted for. In the first place it is very difficult to speak for a sister city where a few hours might be in the room; the doors and windows were open, and this rendered it impossible for the students to make themselves heard by the stage, though they spoke very loud; the pelled to stand, and as those standing in the back part of the room could not hear, nor searcely see, what was going on of course they became noisy, and on one or two occasions some one became quite boistrous, and was severely rebuked by Prof. Singleton. The Ohio Scale Works of Cincinnat ave just completed and are now introduc ing to the public a Handsomely finished Family Scale, an article that has always been needed in every household, and in a communication addressed to the publishers demonstrated. The children all did well of this paper the proprietors ask us to rein their various roles, and the parents have fer them to some reliable party, to introiust cause to feel proud over the learning duce it for them to the people of this coun ty. It is very seldom that a new article steps so suddenly into universal favor. Housekeepers are loud in its praise, it is nlways ready, there are no weights to get lost or to be hunted up, is reliable, and will Chariton county, Missouri, expose to sale the above not get out of order. The description of hidder for cash, for the purpose of satisfying said them is a handsome base surmounted by a column in which works a spiral spring so scientifically adjusted as to weigh anything up to twelve pounds with perfect ac curacy, on the top of the column is the platform on which the articles to be weighed are placed, and they have an adjustable indicator so that you can take the ture of any vessel you may use in weighing, giving you the exact net weight. Housekeepers at once see their value in weighing fruits, sugars and other ingredients used in preserving, cooking, ect., or in testing the veights of purchases from others.

The Scales are made of all Brass, are highly pollished and are finished in a skillful manner. They are very attractive and take the eye of every one who sees them. It seems to us that nearly every family in this country will want one, and is certainly a rare opportunity for some smart and energetic party to pick up quite a nice little income during the next few months, The Company has agents in other counties who are easily making from \$5 00 to \$6 00 per day selling them, and we would recommend parties in need of employment to drop the OHIO SCALE WORKS, No. 125 and 127 Central Avenue, Cincinnati, O., a Postal Card, and all information, eet., will be cheerfully given them by mention ing our paper .- Adr. 45-49.
